Objective

To obtain a Full-Stack Developer position within a forward-thinking company that values robust problem-solving and technical excellence. I am eager to apply my proficiency in JavaScript, React.js, Node.js, and database technologies to design, build, and deploy efficient web applications. By collaborating on impactful projects, my goal is to drive technological advancement and deliver measurable value to the organization, while continuously growing my expertise in software development and expanding my freelance success.

Education

Lovely Professional University **Phagwara, Punjab**
Bachelor of Technology in Computer Science and Engineering, CGPA: 7.47 *Aug´23 - Present*
Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Artificial Intelligence, Computer Networks, Software Engineering

Aligarh Public School **Aligarh, UP**
Senior Secondary School Certificate (12th Grade), Percentage: 85% *Apr´22 - Mar´23*
Key Subjects: Physics, Chemistry, Mathematics, Computer Science

M.U COLLEGE School **Aligarh, UP**
Secondary School Certificate (10th Grade), Percentage: 81% *Apr´20 - Mar´21*
Achievements: IMO Silver Medalist

Technical Skills

Programming Languages: C++, JavaScript, C, PHP, Java, HTML, CSS
Tools/Technologies: MySQL, MongoDB, VS Code
Soft Skills: Strategic Thinker, Problem Solving, Quick Learner
Databases: MySQL
Frameworks: Node.js, React.js, Tailwind CSS

Projects

Project Title: *Space Dodger Game*
Description: Built a real-time 2D game engine implementing physics-based movement with gravity simulation and collision detection using Rectangle intersection algorithms for asteroid-spaceship interactions.
Technologies Used: Java, Java Swing, Graphics2D, Array List, File I/O, Audio System API.
Impact/Achievements: Delivered engaging gameplay with adaptive mechanics, animated star field parallax, gradient color blending, and frame-based explosion animations.
Demo/Code Link: https://github.com/Raihanalam123/FullStackProject

Project Title: *Super Furniture House*
Description: Constructed a full-stack furniture e-commerce platform allowing users to explore products across multiple categories with search and filtering.
Technologies Used: React.js, Node.js, Express.js, MongoDB, Mongoose, JavaScript, JWT, HTML, CSS.
Impact/Achievements: Orchestrated backend REST APIs with Node.js and Express.js to handle products, users, and orders while utilizing MongoDB for scalable database management.
Demo/Code Link: https://github.com/Raihanalam123/SpaceDodgerGame

Certifications

Mastering JAVA for Application Development: Certificate Course on mastering Java for application development, awarded by LPU. (Completed Jul 2025)
Computer Communications: Certification in computer communications and networking, awarded by Coursera. (Completed Nov 2024)
Responsive Web Design Certificate: Certification in responsive web design principles and practices, awarded by FreeCodeCamp. (Completed Oct 2023)

AI Recommendations for Improvement

Recommendation 1: Integrate TypeScript and testing frameworks to improve code quality and production readiness.
Recommendation 2: Use freelance experience and projects to apply for full-stack developer internships.
Recommendation 3: Solve 250+ DSA problems on LeetCode and GeeksforGeeks to boost interview performance.

Self-Assigned Tasks (Till 10th week of this semester)

Task 1: Build a TypeScript-based full-stack application with authentication and role-based access control to demonstrate advanced backend architecture skills and improve code maintainability.
Task 2: Add unit and integration testing (Jest + React Testing Library) to your Super Furniture House project and deploy it using a cloud service like Verel or Railway to showcase production-ready skills.
Task 3: Consistently practice Data Structures and Algorithms to reach a target of solving 500+ questions across LeetCode and GeeksforGeeks to strengthen interview readiness for top software companies.

Targets Allocated (Till 10th week of this semester)

Targets Approved by Course Instructor

- Finish a TypeScript based full-stack application and role-based access control.
- Solve 250+ problems on platforms like LeetCode, GFG and HackerRank.
- Update your previous project "Super Furniture House"
